

APA-MA, MIT/DUSP, MACP, and MAPD* present a special screening of the film: "The Human Scale"

CM | 2.0 "AICP members can earn 2.0 Certification Maintenance (CM) credits for this activity. More information about AICP's CM program can be found at www.planning.org/cm."

Over half of the world's population lives in urban areas. By 2050 this will increase to 80%. Life in a mega city is both enchanting and problematic. Today we face peak oil, climate change, loneliness and severe health issues due to our way of life. But why?

The Danish architect and professor Jan Gehl has studied human behavior in cities through 40 years. He has documented how modern cities repel human interaction, and argues that we can build cities in a way that takes human needs for inclusion and intimacy into account.
